MEMORANDUM FOR SUPPLY PROCESS REVIEW COMMITTEE (PRC) MEMBERS

SUBJECT: Proposed Defense Logistics Management System (DLMS) Change (PDC) 1019, Small Arms/Light Weapons (SA/LW) Local Stock Number (LSN) Assignment for use by DLA Disposition Services in DLMS 511R, 527R, 846C, 846R, 947I, under Reutilization Business Integration (RBI) (Supply)

We are forwarding the attached proposed change to DLM 4000.25, Defense Logistics Management System (DLMS), for evaluation and submission of a single coordinated DOD Component position. It is the responsibility of the Component Supply PRC representative to ensure full coordination of the proposal within your Component.

Request you review the attached proposed change and provide your comments/concurrence to DLA Logistics Management Standards Office not later than **30** days from the date of this memorandum. If non-concurrence is provided, please provide an alternate method to meet the requirement being addressed.

Addressees may direct questions to Mr. Lou Madrigal, 703-767-2011 or DSN: 427-2011 or email to: luis.madrigal@dla.mil. Others must contact their Component designated Supply PRC or JPIWG representative.

DONALD C. PIPP
Director
DLA Logistics Management
Standards Office

PDC 1019
SA/LW LSN Assignment for use by DLA Disposition Services in DLMS 511R, 527R, 846C, 846R, 947I under RBI

1. ORIGINATING SERVICE/AGENCY AND POC INFORMATION:

a. Technical POC: DLA Logistics Information Service, LAR 269.961.5748

b. Functional POC: DLA Disposition Services, DB 269.961.5898

2. FUNCTIONAL AREA:

a. Primary/Secondary Functional Area: Supply/Logistics

b. Primary/Secondary Functional Process: Materiel Receipt Notifications

3. REFERENCES:

a. DLA Logistics Management Standards memorandum March 28, 2012; subject Approved DLMS Change (ADC) 466, Revised Procedures to Support Requisitioning and Transaction Exchange associated with DLA Disposition Services under Reutilization Business Integration (RBI) (Staffed as PDC 453)

b. DLMS memorandum February 21, 2012; subject Approved DLMS Change (ADC) 412, Intra-DLA Change – Establish New DLMS Supplement 846C, DLA Disposition Category Update Transaction and Procedures for use by DLA Disposition Services under Reutilization Business Integration (RBI) (Staffed as PDC 436)

c. DLMS memorandum January 5, 2012; subject Approved DLMS Change (ADC) 470, Revise DLMS Supplement (DS) 846R, Location Reconciliation Request in Support of Reutilization Business Integration (RBI) (Supply)

d. DLMS memorandum November 15, 2011; subject Approved DLMS Change (ADC) 443, Intra-DLA Revisions to Procedures and to 527R Receipt and 947I Inventory Adjustment for the Downgrade for Scrap Process for use by DLA Disposition Services under Reutilization Business Integration (RBI) (Supply) (Staffed as PDC 462)

e. DLMS memorandum December 21, 2011; subject Approved DLMS Change (ADC) 457, Intra-DLA Revisions to Procedures and DLMS 511R Requisition to Support Directed Release of Materiel (Post-Post Action) by DLA Disposition Services Field Offices under Reutilization Business Integration (RBI) (Staffed as PDC 432)

4. REQUESTED CHANGE(S):

a. Brief Overview of Change: Due to the unique situation present with confiscated or foreign captured weapons and the effort required to create a Materiel Master within DLA's Enterprise Business System (EBS), a DLMS change is required to allow for two Stock Numbers

(one being the DOD SA/LW Serialization Program authoritative LOGSA-generated Management Control Number (MCN) and the other being the EBS Materiel Master Disposition Local Stock Number (LSN) for Small Arms) to be passed on the materiel receipt and to identify which stock number is the LOGSA-generated MCN and which is the Disposition LSN. This PDC similarly applies the LOGSA-generated MCN and Disposition LSN to the DLMS supplements that the DLA Disposition Services Field Office will use to apprise DLA Disposition Services as these weapons process through to demilitarization.

b. <u>Background</u>: The DLA Disposition Services is a worldwide presence within the Department of Defense, with disposal specialists in 14 foreign countries, two U.S. territories, and 39 states. DLA Disposition Services' mission is the execution of disposition solutions for excess military property. The RBI project will replace the Defense Reutilization and Marketing Service (DRMS) Automated Information System (DAISY) by integrating DLA Disposition Services business processes within the DLA enterprise suite of applications, including EBS for materiel management functions and Distribution Standard System (DSS) for warehousing/distribution functions.

DLA Disposition Services requires that the above noted transactions send a disposition LSN for communications between DSS and EBS in addition to the LOGSA generated MCN for confiscated or foreign captured weapons. This requires that both identifying numbers (LOGSA generated MCN and the disposition LSN) be carried on the DLMS transactions for RBI and that the transactions be modified to allow for a notation that will specify which stock number is which. For non-Small Arms property, these transactions carry the NSN or an agreed upon Disposition LSN that identifies the property in DSS and EBS. Because the Disposition LSN refers to a specific grouping/category of non-NSN property, it has the effect of reducing the number of LSNs in the system and helps to keep like items grouped together under a common identifier instead of allowing for a proliferation of LSNs that, over time, would become unmanageable. Small Arms regulations require that systems use a LOGSA generated MCN for foreign captured or confiscated weapons to identify those weapons as they proceed through the system and to enable full tracking of these weapons in DOD and Component SA/LW Registries throughout processing.

c. <u>Describe Requested Change in Detail</u>: Both DSS and EBS shall carry and store the LOGSA generated MCN and it would be beneficial to use a Disposition LSN specific to small arms, which will help to keep these items segregated from the regular Small Arms property. Component turn-in activities must send confiscated and foreign captured weapons immediately to destruction/demilitarization processing. Because of this, it provides no significant benefit to the enterprise to create a specific and separate materiel master for items that will only be received and subsequently destroyed. This change requests that DLMS transactions be modified to allow for the inclusion of the Disposition LSN in addition to the LOGSA generated MCN. This PDC covers not only modification of the 527R for receiving but also the 511R, 846C, 846R, and the 947I to accommodate downstream processing of these items:

527R (Materiel Receipt): If a small arms item is receipted at a DLA Disposition Services Field Office, a 527R is sent to DLA Disposition Services. DLA Disposition Services will need to be able to keep track of the inventory at the serial number level. Therefore, it needs to be passed between both systems for accountability purposes.

511R (Post-Post Requisition): If a small arms item is to be demilitarized, a 511R identifying a post-post materiel release will be sent from the DLA Disposition Services Field Office to DLA Disposition Services to remove the small arms property from the record. Because DLA Disposition Services will need to track and update the inventory at the serial number level, the MCN and Disposition LSN must be passed on this transaction for accountability purposes. The residual scrap materiel is then received on the record via a scrap receipt based on dominant materiel content and processed via standard scrap procedures, where the MCN is no longer tracked.

846C (Disposition Status Update): If status updates are provided from the DLA Disposition Services Field Office to DLA Disposition Services (or vice versa), DLA Disposition Services will need to be able to keep track of the updates at the serial number level. Therefore, the MCN and Disposition LSN need to be passed between both systems for accountability purposes.

846R (Inventory Reconciliation Management- daily and annual): When inventory is performed daily or annually at a DLA Disposition Services Field Office, the 846R transaction is sent to DLA Disposition Services with updated inventory records. DLA Disposition Services will need to be able to keep track of the inventory at the serial number level. Therefore, the MCN and Disposition LSN need to be passed between both systems for accountability purposes.

947I (Inventory Adjustment): If the quantity of a materiel on hand at a DLA Disposition Services Field Office needs to be adjusted for any approved reason, a 947I is sent with the updated quantity to DLA Disposition Services. DLA Disposition Services will need to be able to keep track of the inventory at the original serial number level. Therefore, it needs to be passed between both systems for accountability purposes.

d. <u>Revisions to DOD 4000.25 Manuals</u>: TBD

e. <u>Proposed Transaction Flow</u>: No new transactions or routing rules are required.

f. <u>Alternatives</u>: None available at this time.

5. REASON FOR CHANGE: Normally, the interchange of information between DSS and EBS for SA/LW transactions uses National Stock Numbers (NSNs). In the event that a weapon is confiscated from a civilian or captured from a foreign combatant, these weapons typically will not have an appropriate NSN to identify them. When this occurs, DOD SA/LW Serialization Program policy in DLM 4000.25, DLMS, Volume 2, Chapter 18, requires that the DOD Component obtain an MCN, or NSN if available, from DOD SA/LW Registry, to use to identify the weapon. Applicable DLMS excerpt below:

"C18.2.3. Small Arms and Light Weapons without a National Stock Number and/or Serial Number. When discovered, SA/LW without a National Stock Number (NSN) and/or SA/LW (except museum pieces) with missing, obliterated, mutilated, or illegible serial numbers shall be reported to the DoD Registry by the Component Registry for review and assignment of a Management Control Number (MCN)/NSN and/or serial number. Assignment of Local Control Number (LCN) or MCN shall not replace or be used in lieu of procedures to request assignment of an NSN where applicable."

Due to the large number of MCNs that are created for these purposes and the fact that these weapons are only allowed to be destroyed, it benefits DLA Disposition Services not to have to create a specific Materiel Master record for each of these MCNs. For the DLMS transactions, the DOD SA/LW Serialization Program authoritative MCN will be the primary materiel identification in the transactions; the disposition services assigned LSN as a secondary reference. The SA/LW specific DLMS 140A (SA/LW Reporting) transaction must cite the DOD SA/LW Serialization Program authoritative MCN.

6. ADVANTAGES AND DISADVANTAGES:

a. Advantages:

(1) Proper inventory accountability records will be kept for SA/LW LOGSA generated MCNs and disposition LSNs, ensuring proper auditability of the records and maintaining consistency throughout data.

(2) Use of the disposition LSNs will result in significantly less work required to create Materiel Master records that may only be used a few times.

b. Disadvantages: Updating these transactions may require coding changes in the RBI system suite to accommodate the field and values required to notate which NSN/LSN is which. Failure to accomplish these changes will result in significant coding changes being required.

7. ASSUMPTIONS USED OR WILL BE USED IN THE CHANGE OR NEW DEVELOPMENT: Confiscated and foreign captured weapons will only be turned in to the DLA Disposition Services Field Office that will demilitarize the weapons. If another DLA Disposition Services Field Office accepted the weapons and then shipped them to another DLA Disposition Field Office for demilitarization, the 856S and 945A would need to be modified as well to carry the disposition LSN.

8. ESTIMATED TIME LINE/IMPLEMENTATION TARGET: Target implementation date is December 3, 2012

9. ESTIMATED SAVINGS/COST AVOIDANCE ASSOCIATED WITH IMPLEMENTATION OF THIS CHANGE: N/A

10. IMPACT:

a. New DLMS Data Elements: Disposition Local Stock Number

b. Changes to DLMS Data Elements: None

c. Automated Information Systems (AIS): Updating these transactions will require minor coding changes in the RBI system suite to accommodate the field and values required to notate which NSN/LSN is which

d. <u>DLA Transaction Services</u>: DLA Transaction Services mapping for the NSN/LSN Record section must be updated to allow for the required identifier values to notate when an LSN is the LOGSA Approved LSN vice the Standardized LSN.

e. <u>Non-DLA Logistics Management Standards Publications</u>: Update all appropriate Disposition Services Manual/documentation as appropriate.

ENCLOSURE TO PDC 1019

A. DLMS Supplement (DS) 511R Change Table:

#	Location	DLMS 511R Revision	Reason
1	DLMS Intro Notes	Add PDC 1019 to DLMS Introductory note: - *PDC 1019, Small Arms/Light Weapons (SA/LW) Local Stock Number (LSN) Assignment for use by DLA Disposition Services in DLMS 511R, 527R, 846C, 846R, and 947I, under Reutilization Business Integration (RBI) (Supply).*	Identifies changes included in DS.
2	2/P0106/ 030	Add DLMS Note 2 to existing qualifier ZZ: **ZZ Mutually Defined** ***1.*** Use to identify nonstandard materi***e***~~a~~l when all other authorized codes do not apply or cannot be determined (includes management control numbers and locally assigned control numbers). May be used for DLSS-to-DLMS conversion when the translator cannot determine a more appropriate code. ***2. DLA Disposition Services Field Offices use on DLA-Directed MROs (DIC C0_) for post-post issues to provide the DoD small arms/light weapons (SA/LW) program authorized management control Number (MCN).***	Clearly identifies mapping for the DOD SA/LW Serialization Program MCN assigned by the DOD SA/LW Registry (Army LOGSA).

#	Location	DLMS 511R Revision	Reason
3	2/P0108/ 030	Add qualifier SW with DLMS Note: **SW Stock Number** **DLMS Notes:** ***1. Use to identify the local stock number (LSN). DLA Disposition Services Field Offices use with 511R DLA-Directed MROs (DIC C0_) for confiscated or captured foreign weapons, to identify the disposition LSN in addition to the SA/LW MCN cited in P0106/P0107 by qualifier ZZ. Authorized DLMS enhancement for DLA Disposition Services. DLA Disposition Services requires the disposition LSN for internal DLA processing only. Refer to PDC 1019.***	To provide for the disposition LSN, which DLA requires for intra-DLA communication between DSS and EBS. In order to maintain the integrity of the DoD SA/LW Serialization program, the authoritative MCN is cited in the transaction at P0106/07/ZZ; however, both the MCN and the disposition LSN are readily available in the P01 segment for use as needed between DSS and EBS. For internal communications, EBS and DSS would have internal rules as needed to use the disposition LSN, with the understanding that they have to keep visibility of the authoritative MCN, in the event they have to transact external to DLA. The disposition LSN is for intra-DLA use only. Transactions that process external to DLA such as DLMS 140A, DLMS 888A, supply discrepancy reporting (SDR), etc., when applicable, must perpetuate the authoritative SA/LW MCN value as the primary materiel identification.

B. DLMS Supplement (DS) 527R Receipt Change Table:

#	Location	DLMS 527R Receipt Revision	Reason
1	DLMS Intro Notes	Add PDC 1019 to DLMS Introductory note 5: - *PDC 1019, Small Arms/Light Weapons (SA/LW) Local Stock Number (LSN) Assignment for use by DLA Disposition Services in DLMS 527R, 846C, 846R, and 947I, under Reutilization Business Integration (RBI) (Supply).*	Identifies changes included in DS.
2	2/LIN02/ 010	Add DLMS Note 2 to existing qualifier ZZ: **ZZ Mutually Defined** ***1.*** Use to identify nonstandard materi~~e~~al when all other authorized codes do not apply or cannot be determined (includes management control numbers and locally assigned control numbers). May be used for DLSS-to-DLMS conversion when the translator cannot determine a more appropriate code. ***2. Use when a management control number (MCN) is provided. This includes the MCN assigned by the DOD small arms/light weapons (SA/LW) Registry for the DOD SA/LW Serialization Program, IAW DLM 4000.25, DLMS, Volume 2.***	Clearly identifies mapping for the DOD SA/LW Serialization Program MCN assigned by the DOD SA/LW Registry (Army LOGSA).
3	2/LIN04/ 010	Add new DLMS note 3 to existing qualifier SW: **SW Stock Number** **DLMS Notes:** 1. Use to identify the local stock number (LSN). 2. The LSN is provided as a cross-reference when unit of use indicator is included and the unit of use LSN is identified as the primary materiel identification. Authorized DLMS enhancement under DLA industrial activity support agreement. ***3. DLA Disposition Services uses with receipt and historical receipt transactions, for confiscated or captured foreign weapons, to identify the disposition LSN in addition to the SA/LW MCN cited in LIN02/LIN03 by qualifier ZZ. Authorized DLMS enhancement for DLA Disposition Services. DLA Disposition Services requires the disposition LSN for internal DLA processing only. Refer to PDC 1019.***	To provide for the disposition LSN, which DLA requires for intra-DLA communication between DSS and EBS. In order to maintain the integrity of the DOD SA/LW Serialization program, the authoritative MCN is cited in the transaction at LIN02/03/ZZ; however, both the MCN and the disposition LSN are readily available in the LIN segment for use as needed between DSS and EBS. For internal communications, EBS and DSS would have internal rules as needed to use the disposition LSN, with the understanding that they have to keep visibility of the authoritative MCN, in the event they have to transact external to DLA. The disposition LSN is for intra-DLA use only. Transactions that process external to DLA such as DLMS 140A, DLMS 888A, supply discrepancy reporting (SDR), etc., when applicable, must perpetuate the authoritative SA/LW MCN value as the primary materiel identification.

C. DLMS Supplement (DS) 846C Change Table:

Item #	Location	DLMS Supplement 846C Disposition Category Update Revision	Reason
1	DLMS Intro Notes	Add PDC 1019 to DLMS Introductory note 5: *- PDC 1019, Small Arms/Light Weapons (SA/LW) Local Stock Number (LSN) Assignment for use by DLA Disposition Services in DLMS 527R, 846C, 846R, and 947I, under RBI. (Supply)*	Identifies changes included in DS.
3	2/LIN02/ 0100	Add qualifier ZZ with DLMS note. **ZZ Mutually Defined** **DLMS Note:** ***Use when a management control number (MCN) is provided. This includes the MCN assigned by the DoD small arms/light weapons (SA/LW) Registry for the DoD SA/LW Serialization Program, IAW DLM 4000.25, DLMS, Volume 2.***	Clearly identifies mapping for the DoD SA/LW Serialization Program MCN assigned by the DoD SA/LW Registry (Army LOGSA).
