MEMORANDUM FOR DLA MMLSI  
 ATTN: MR. BOB VITKO

SUBJECT: Request for Waiver on Use of Disposal Turn In Document (DTID) DD Form 1348-1/1A

This memorandum requests a waiver to DoD 4000.25-1-M requiring the use of a Disposal Turn In Document (DTID), DD Form 1348-1/1A with handwritten signature for receipt of property, particularly hazardous property.

DRMS was designated to operate the DoD hazardous waste (HW) program in accordance with Defense Environmental Quality Program Policy Memorandum (DEQPPM) 80-8 dated October 21, 1980. To administer this program, DRMS uses the Defense Reutilization and Marketing Automated Information System (DAISY) and Base Operations Support System (BOSS). DRMS is working actively with Defense Environmental Security Corporate Information Management (DESCIM) Hazardous Substance Management System (HSMS) to persuade the military services to use electronic turn-in procedures.

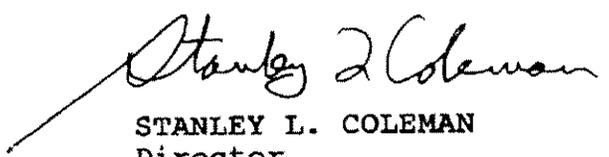

DRMS has developed a PC application that interfaces with DAISY and BOSS to eliminate redundant data entry at the Defense Reutilization and Marketing Offices (DRMOs) for receipt of Hazardous Property (HP), including hazardous waste for disposal processing. This application is known as the Single Hazardous Input Program (SHIP) which allows DRMOs to accept electronic turn in data from generating activities while reducing the number of redundant and repetitive keystrokes required. A part of SHIP, called Generator Communication (GENCOM), provides the generator the software to allow electronic transfer of data to the DRMO eliminating the hard copy documentation requirement.

At the present time, each turn-in of property, including hazardous, requires that a hard copy DD Form 1348-1/1A be produced by the generator and furnished to the DRMO. SHIP proposes elimination of the hard copy DD Form 1348-1/1A by using SHIP GENCOM and an automated data set. The data set was developed using current computer technology by generating an automated DD Form 1348-1/1A which provides all data required for turn-in to DRMO for disposal processing.

DRMS will obtain a Memorandum of Understanding (MOU) with each generating activity specifying the operation, funding, logins, and documentation to support SHIP.

DRMS is also pursuing the development of the Electronic Data Interchange (EDI) 940 transaction set for DRMO turn-ins; however, this is not expected to occur soon.

Request your expeditious attention to this waiver request. DRMS point of contact is Michael Dawson, DRMS-USP, (DSN) 932-5311.
