MEMORANDUM FOR SUPPLY PROCESS REVIEW COMMITTEE (PRC) MEMBERS

SUBJECT: Approved Defense Logistics Management System (DLMS) Change (ADC) 313, Revisions to DLMS 527R to Add Code for MILSTRAP DRB Functionality and to Address Enhancement for MILSTRIP Advice Codes Used with 527R Receipt and Response to Inquiry for Materiel Receipt (Supply) (Staffed as PDC 330 and released as Request for Implementation Date for ADC 313)

The attached change to DOD 4000.25-M, DLMS, and DOD 4000.25-1-M, Military Standard Requisitioning and Issue Procedures (MILSTRIP), is approved for staggered implementation, immediately or as early as possible. Components should ensure that inclusion of data described in this change for the DLMS 527R does not cause inappropriate rejection of the transaction. DOD 4140.1-R requires that the DOD Components provide the DLA Logistics Management Standards office with status on implementation of approved DLMS changes. **Implementation information provided to date by the DOD Components is shown below, but was not adequate to establish an implementation date for ADC 313. The Supply PRC representatives must monitor for implementation of ADC 313 and provide projected implementation dates when known:**

Air Force: Air Force's planned implementation date is March 2015. Air Force Supply PRC representative to monitor for implementation of this ADC and advise if date changes.

Army: Army National wholesale system (Logistics Modernization Planning (LMP) and Standard Depot System (SDS)): Pending more information to be gathered the middle of 2011 when HQ AMC approves LMP's new work schedule, Army's wholesale level implementation date is 2015 for this system. Army's projected implementation for Global Combat Support System (GCSS)-Army is 3rd Quarter Fiscal Year (FY) 2012. Army Supply PRC representative to monitor for implementation of this ADC and provide implementation dates when available.

Defense Logistics Agency: DLA implementation date for Distribution Standard System (DSS) and Enterprise Business System (EBS) is unknown at time of publication of this ADC. DLA Supply PRC representative to monitor for implementation of this ADC and provide DSS and EBS implementation dates when available.

Marine Corps: Marine Corps anticipates implementation in GCSS-Marine Corps in FY 14; Marine Corps anticipates wholesale systems to implement no later than FY16. Marine Corps Supply PRC representative to monitor for implementation of this ADC and provide implementation dates when available.

Navy: Navy Implementation date unknown at time of publication of this ADC. Navy Supply PRC representative to monitor for implementation of this this ADC and provide implementation date when available.

GSA: GSA will implement during the planned system modernization on schedule for FY2011 or later.

Addressees may direct questions to Ms. Mary Jane Johnson, DOD MILSTRAP Administrator, email: Mary.Jane.Johnson@dla.mil. Others must contact their Component designated Supply PRC representative.

DONALD C. PIPP

Director

4. APPROVED CHANGE DESCRIPTION: This change addresses two separate and distinct requirements as follows:

a. Provides a new DLMS 527R beginning segment action code to provide functionality of MILSTRAP (reference 3a) Document Identifier Code (DIC) DRB-MRA Reply to Follow-up. In

the original DLMS 527R design for MRA, the function that an MRA was sent in response to a followup was not incorporated by intent. The current MILSTRAP Administrator later reconsidered that decision in favor of including the DRB functionality. Initially the MILSTRAP Administrator anticipated using an advice code to identify that the MRA was in response to a followup. The DLMS 527R advice code field was updated with a DLMS note to reflect this, but an advice code was never assigned for that function. Upon further consideration, the administrator determined a beginning segment level code would better address the DIC DRB functionality. Accordingly, this change provides for use of 527R beginning segment (BR06) Action Code V–Respond, used in conjunction with BR02 Transaction Type Code for MRA (Transaction Type Code TH), to indicate that an MRA is being sent in response to an MRA follow-up.

b. Highlights the procedures for a 1990 MODELS (now known as DLMS) enhancement (reference 3b) for use of advice codes with DLMS 527R receipt transaction and with the DLMS 527R response to inquiry for materiel receipt transaction. This change also updates the enhancement to add an additional advice code for use with ‘response to inquiry for materiel receipt’ to identify when the storage activity has no receipt in process but there is a Prepositioned Materiel Receipt (PMR) file. This change also updates the associated DOD 4000.25-M, DLMS, Volume 2 (reference 3c), Chapter 13 procedures for response to inquiry for materiel receipt. The MODELS enhancement is summarized at the enclosure. The original enhancement added the following advice code values to MILSTRIP for use with DLMS 527R receipt, and with DS 527R Response to Inquiry for Receipt status:

CODE	EXPLANATION
3K	Storage activity response to inquiry for receipt status. Storage activity has the receipt in process.
3N	Storage activity response to inquiry for receipt status. Storage activity has no receipt in process and no record of the due-in.
3P	Storage activity response to inquiry for status on receipt or reclassification action that is a duplicate of the original receipt or adjustment provided by the storage activity.

This ADC approves adding a new advice code for use with DLMS 527R response to inquiry for receipt status as follows:

CODE	EXPLANATION
3M	<i>Storage activity response to inquiry for receipt status. Storage activity has no receipt in process but there is a Prepositioned Materiel Receipt (PMR) file. Refer to ADC 313</i>

This change also updates the associated DLMS Volume 2, Chapter 13 procedures for the new advice code 3M.

5. BACKGROUND FOR ESTABLISHING IMPLEMENTATION DATE: Many years ago, DLA Logistics Management Standards and the Supply PRC stopped using the established Request for Implementation Date (RFID) process to identify joint implementation dates for approved changes. The process stopped being effective because many of the Components were in the process of developing ERPs and were unable to provide projected implementation dates; and they were not making changes in legacy systems. In December 2008, since some ERPs were implemented, the DOD MILSTRAP Administrator attempted to establish a joint Component

implementation date for ADC 313 using a Request for Implementation Date memorandum (reference 3.e.), as a planning tool to assist in implementing changes. This attempt had mixed results and did not achieve the goal of identifying a joint implementation date and the ADC has since remained in limbo.

6. IMPLEMENTATION TARGET: The DOD Component implementation date information for ADC 313, provided in response to the December 2008 Request for Implementation Date and subsequent follow-up, is shown at paragraph 13. Responses were not satisfactory to establish a joint DOD implementation date. **This ADC therefore documents implementation status available as of the date of this memorandum, and requires that the Components monitor for implementation of ADC 313 and advise of firm implementation dates when known.** This supports the DOD 4140.1-R (reference 3h.), Appendix 13, requirement for the DOD Components to provide the DLA Logistics Management Standards office with status on implementation of approved DLMS changes.

7. PUBLICATION. ADC 313 will be published in the reissuance of DOD 4000.25-M (DLMS) and DOD 4000.25-1-M (MILSTRIP), anticipated for 3rd Quarter FY 2012. Components should ensure that inclusion of data described in this change in the 527R does not cause inappropriate rejection of the transaction. Data includes:

a. 527R Receipt Advice Codes-Requirements for:

1) Storage activities to:

a) Generate Advice Code 3P with DLMS 527R receipt transactions (527R with 1/BR02/20 Transaction Type Code D4-Receipt) when sending a duplicate receipt in response to a DLMS 527R inquiry for receipt status transaction (527R 1/BR02/20 Transaction Type Code IN-Inquiry (DIC DXA/DXB functionality))

b) Generate the following advice codes when storage activity sends DLMS 527R Response to Inquiry for receipt status (527R 1/BR02/20 Transaction Type Code DG-Response (DIC DXC/DXD functionality)):

- Advice Code 3K when the storage activity has the receipt in process.
- **New Advice Code 3M** when storage activity has no receipt in process but there is a PMR.
- Advice Code 3N when storage activity has no receipt in process and no record of PMR.

2) Inventory Control Points (ICPs) recognize and process the above Advice Codes 3K, 3M, and 3N when received in DLMS 527R Response to Inquiry for Receipt Status; and Advice Code 3P when received in DLMS 527R Receipt transactions, and take action accordingly for delinquent intransit dues-in.

b. 527R MRA Beginning Segment Action Code V. DLMS 527R MRA to include use of beginning segment Action Code V when sending an MRA in response to a follow-up.

Provides a means to differentiate at the beginning segment whether this is an initial MRA (MILSTRAP DRA functionality), or an MRA in response to a follow-up (MILSTRAP DRB functionality).

8. REASON FOR CHANGE:

a. Supports the DLMS enhancement for use of advice codes documented in 527R, 2/LQ/130 code 80-Advice Code DLMS Note 1. “Use when submitting a duplicate receipt in reply to a receipt inquiry; when submitting a response to a receipt inquiry when there is a receipt in process; when there is no receipt in process and no advance receipt information file; when there is no receipt in process but there is an advance receipt information file; ... DLMS enhancement, see DLMS introductory note 5a.”

b. Revises DLMS 527R to accommodate MILSTRAP DIC DRB functionality by use of a beginning segment action code.

9. PROCEDURES:

a. **Revise DOD MILSTRIP (references 3.d), Appendix AP2.15, Advice Codes, as revised by ADC 387 (reference 3.f.),** to add new advice code 3M; administrative update to codes 3N and 3P; and to identify in the code list a separate category applicable to DLMS Receipt, Response to Receipt Inquiry, and Inventory Adjustment Transaction Advice Codes. The addition of the new category is consistent with the existing Advice Code list which identifies categories to include: Requisition Transaction Advice Codes and Materiel Returns Program Advice Codes. Corresponding changes will be made to advice code in the DLMS Data Dictionary (reference 3.g.). Changes are identified by *red, bold italics*:

<i>DLMS RECEIPT, RESPONSE TO RECEIPT INQUIRY, AND INVENTORY ADJUSTMENT TRANSACTION ADVICE CODES</i> ¹³	
CODE	EXPLANATION
3K	Storage activity response to inquiry for receipt status. Storage activity has the receipt in process. <i>Refer to ADC 313.</i>
<i>3M</i>	<i>Storage activity response to inquiry for receipt status. Storage activity has no receipt in process but there is a Prepositioned Materiel Receipt (PMR) file. Refer to ADC 313.</i>
3N	Storage activity response to inquiry for receipt status. Storage activity has no receipt in process and no record of the due-in/ <i>PMR</i> . <i>Refer to ADC 313.</i>
3P	Storage activity response to <i>an</i> inquiry for status on receipt, or <i>in response to a follow-up for</i> asset reclassification, followup to indicate that the transaction being submitted is a duplicate of the original receipt <i>transaction</i> , or inventory adjustment transaction, provided by the storage activity. Caution must be used by the recipient to assure that the transaction is not processed twice. <i>Refer to ADC 313 and ADC 487.</i>

¹³ ***DLMS enhancement. Not for use in corresponding legacy 80 record position transactions. Refer to ADC 313. DOD Components must provide DLA Logistics Management Standards Office with their Component implementation date for ADC 313.***

b. **Revise DOD 4000.25-M, DLMS, Volume 2, Chapter 13 (Receipt), Paragraph C13.4,** as follows (changes identified by *red, bold, italics*):

“C13.4. STORAGE ACTIVITY RESPONSE TO INQUIRY ON MATERIAL RECEIPT¹

C13.4.1. Material Receipt Previously Processed. When material has been received, and a receipt was previously submitted, storage activities shall submit a duplicate Receipt Transaction citing Advice Code 3P.

C13.4.2. Receipt in Process. When the storage activity has the receipt in process, storage activities shall reply using the Response to Inquiry Transaction citing Advice Code 3K.

C13.4.3. ***No Receipt but Record of Due-In.** When the storage activity has no receipt in process but there is a **Prepositioned Materiel Receipt (PMR)** file, the storage activity shall reply using the Response to Inquiry Transaction citing Advice Code 3M.*

C13.4.4. No Receipt and No Record of Due-In. ~~For nonreceipt of material, storage activities shall reply using the Response to Inquiry Transaction citing Advice Code 3N which indicates that the storage activity has no receipt in process and no record of the due-in.~~ When the storage activity has no receipt in process and no record of an ***PMR file***, the storage activity shall reply using the Response to Inquiry Transaction citing Advice Code 3N.”

c. **Revise DOD 4000.25-M, DLMS, Volume 2, Chapter 10, Material Receipt Acknowledgement, Paragraph C10.1.2,** as follows (changes identified by *red, bold, italics*):

“C10.1.2. Transactions. This chapter addresses the procedures applicable to the following ASC X12 transaction functions identified by their beginning segment (1/BR02/020) transaction type code. Other DLMS formats, such as XML, are also available. See the DLA Logistics Management Standards website for available DLMS formats: http://www.dla.mil/j-6/dlms/elibrary/TransFormats/140_997.asp. The corresponding MILSTRAP transaction functionality is identified for information purposes in a mixed DLSS/DLMS environment.

C10.1.2.1. Material Receipt Acknowledgement (MRA) Transaction is DS to the Federal IC 527R, identified by beginning segment Transaction Type Code TH – Receipt Acknowledgement Advice. This transaction provides MILSTRAP DIC DRA functionality.

C10.1.2.2. MRA Response to Inquiry Transaction is DS to the Federal IC 527R, identified by beginning segment Transaction Type Code TH – Receipt Acknowledgement Advice, used in conjunction with 1/BR06/20 Action Code V-Respond. This transaction provides MILSTRAP DIC DRB functionality.¹

C10.1.2.3. MRA Inquiry Transaction is DS to the Federal IC 527R, identified by beginning segment Transaction Type Code TG – Receipt Acknowledgement Inquiry. This transaction provides MILSTRAP DIC DRF functionality.

¹ Refer to ADC 313. DOD Components must provide DLA Logistics Management Standards Office with their Component implementation date for ADC 313.

d. **Revise Correlation of MILSTRAP DIC Functionality to DLMS Supplement (DS)**
Tables as follows (the tables are available at: <http://www.dla.mil/j-6/dlms/eApplications/LogDataAdmin/dlssdlmscrossreftable.asp>):

1) Correlation Table in DIC sequence:

DIC(s)	MILSTRAP TITLE	DS #	DS Accredited Standards Committee (ASC) X12 Functional Equivalent to MILSTRAP DIC	
			Beginning Segment	Additional Information needed
DRA	Materiel Receipt Acknowledgment (MRA)	527R	1/BR02/020 Transaction Type Code TH – Receipt Acknowledgement	None.
DRB	MRA in reply to follow-up	527R	1/BR02/020 Transaction Type Code TH – Receipt Acknowledgement <i>With 1/BR06/020 Action Code V- Respond</i>	<i>None.</i>
DRF	Follow-Up For Delinquent MRA	527R	1/BR02/020 Transaction Type Code TG – Receipt Acknowledgement Inquiry	None.

2) Correlation Table in DLMS sequence:

DS #	DLMS Supplement Title	DIC(s)	DS Accredited Standards Committee (ASC) X12 Functional Equivalent to MILSTRAP DIC	
			Beginning Segment	Additional Information needed
527R	Receipt, Inquiry, Response, MRA Materiel Receipt Acknowledgement (MRA)	DRA	1/BR02/020 Transaction Type Code TH – Receipt Acknowledgement	None.

DS #	DLMS Supplement Title	DIC(s)	DS Accredited Standards Committee (ASC) X12 Functional Equivalent to MILSTRAP DIC	
			Beginning Segment	Additional Information needed
527R	Receipt, Inquiry, Response, MRA MRA in Response to Inquiry/Follow-up	DRB	1/BR02/020 Transaction Type Code TH – Receipt Acknowledgement With 1/BR06/020 Action Code V-Respond	<i>None.</i>
527R	Receipt, Inquiry, Response, MRA Inquiry for Delinquent MRA	DRF	1/BR02/020 Transaction Type Code TG – Receipt Acknowledgement Inquiry	None.

e. **Revise DLMS 527R to add a beginning segment action code to capture MILSTRAP DIC DRB functionality for MRA sent in response to an Inquiry for Delinquent MRA, as follows:**

Item #	Location	Revision to 527R Receipt, Inquiry, Response and MRA	Reason
1.	DLMS Introductory Note	<u>Added ADC 313 to Introductory note 7</u> <i>- ADC 313, Revisions to DLMS 527R to Add Code for MILSTRAP DRB Functionality and to Address Enhancement for Advice Codes Used with 527R Receipt and Response to Inquiry for Materiel Receipt</i>	To identify DLMS changes included in the DS
2.	1/BR02/20	<u>Revise DLMS note for Transaction Type Code TH:</u> TH Receipt Acknowledgment Advice DLMS Note: <i>MRA Transaction.</i> Use for MRA to acknowledge the receipt or nonreceipt of materiel (MILSTRAP DIC DRA functionality). <i>Use in conjunction with BR06 Action Code V-Respond when sending MRA in response to an Inquiry for Delinquent MRA (MILSTRAP DIC DRB functionality.)</i>	To provide functionality of MILSTRAP DIC DRB (MRA Reply to Follow-up)

Item #	Location	Revision to 527R Receipt, Inquiry, Response and MRA	Reason
3.	1/BR06/ 20	<u>Add Action Code V with DLMS note:</u> V Respond DLMS Note: MRA Response to Inquiry Transaction. Use in conjunction with BR02 Transaction Type Code TH when sending an MRA in response to an Inquiry for Delinquent MRA. (MILSTRAP DIC DRB functionality.) Refer to ADC 313.	To provide functionality of MILSTRAP DIC DRB (MRA Reply to Follow-up)
4.	2/LQ01/ 130	<u>Revise DLMS Note 1 for Qualifier 80:</u> 80 Advice Code DLMS Note 1. Use when submitting a duplicate receipt in reply to a receipt inquiry (Advice Code 3P); when submitting a response to a receipt inquiry when there is a receipt in process (Advice Code 3K); when there is no receipt in process and no prepositioned materiel receipt (PMR) file (Advice Code 3N) ; and when there is no receipt in process but there is a PMR file (Advice Code 3M) . Otherwise do not use except as noted below. DLMS enhancement, see DLMS introductory note 5a. Refer to ADC 313.	<p>Cites applicable Advice codes since only 4 codes apply to this transaction.</p> <p>Removes language for an advice code (which was never assigned) to address that an MRA is sent in response to an MRA inquiry. This functionality is being added as a beginning segment action code as noted in row above.</p> <p>Also, incorporates term prepositioned materiel receipt. MILSTRAP Administrator will be making additional changes to DLMS procedures (Volume 2, Chapter 13) and DLMS 527D to revise DLMS term Advance Receipt Information (ARI) to Prepositioned Materiel Receipt (PMR). This change removes an inconsistency between the DLMS (ARI) and MILSTRAP (PMR) language.</p>

10. ADVANTAGES AND DISADVANTAGES:

a. Advantages: Supports an existing DLMS requirement for use of advice codes and supports MILSTRAP DIC DRB functionality.

b. Disadvantages: None.

11. DEFENSE AUTOMATIC ADDRESSING SYSTEM (DAAS): Update DLA Transaction Services mapping as needed.

12. IMPACT:

a. Automated Information System (AIS).

1) Impacts Component ICP and storage activity modernized systems to have system logic to recognize and process the advice codes associated with DLMS 527R Receipt transactions.

2) Impacts Component retail and wholesale modernization systems to recognize and process the new DLMS 527R action code for identifying in the beginning segment when an 527R MRA transaction is being submitted in response to a follow-up (MILSTRAP DIC DRB functionality).

b. Publications.

1) **DoD Level:** Impacts DOD 4000.25-M (DLMS); DOD 4000.25-1-M (MILSTRIP, Appendix AP2.15, Advice Codes); DLMS Data Dictionary; DLMS 527R; and DLA Transaction Services mapping require update as needed.

2) **Component Level:** May impact Component implementation procedures.

13. ESTIMATED TIME LINE/IMPLEMENTATION TARGET: The following implementation date information was provided in response to the Request for Implementation Date for ADC 313:

	RESPONSE TO REQUEST FOR IMPLEMENTATION DATE	DISPOSITION
AIR FORCE 2/5/2010 email response	Implementation date: Mar 2015. Implementation corresponds to the planned date for ECSS to subsume SCS and CAV-AF functionality.	ADC notes: Air Force's planned implementation is March 2015. Air Force Supply PRC representative to monitor for implementation of this ADC and advise if date changes.
ARMY 8/30/2010 email for Wholesale 11/2/2010 email-Retail	Army National wholesale system (LMP and SDS) : Pending more information <u>to be gathered the middle of 2011</u> when HQ AMC approves LMP's new work schedule, Army's wholesale level implementation date is 2015 for this system. Army's Retail projected implementation for GCSS-Army is 3rd Qtr FY2012 (Release 1.2); SARSS legacy system will not implement.	October 2, 2011: Followed up for wholesale systems update. No response received. Army Supply PRC representative to monitor for implementation of this ADC and provide implementation dates when available.
MARINE CORPS 7/27/2010 LPC-2 Letter provided response	1. Legacy retail systems would require significant modifications to address this change. The Marine Corps will not implement ADC 313 in legacy retail systems. 2. Currently the Marine Corps plans to address ADC 313 in its retail systems as part of the GCSS-MC Block 2 deployment. 3. The GCSS-MC Block 2 deployment is scheduled for FY14. 4. Legacy wholesale systems would require significant	ADC notes: Marine Corps anticipates implementation in GCSS-Marine Corps in FY 14; Marine Corps anticipates wholesale systems to implement no later than FY16. Marine Corps Supply PRC representative to monitor for implementation of this ADC and provide implementation dates

	RESPONSE TO REQUEST FOR IMPLEMENTATION DATE	DISPOSITION
	<p>modifications to address this change and updates to comply with ADC 313 are not planned.</p> <p>5. The Marine Corps will determine whether to include wholesale functionality into Block 2 of GCSS-MC or to continue to maintain wholesale functionality independently of the ERP.</p> <p>6. The Marine Corps expects wholesale systems to be implementing ADC 313 no later than FY16.</p> <p>Recommendation: The Marine Corps expects that ADC 313 will be fully implemented no later than FY16.</p>	when available.
NAVY 4/10/2011 email response	Cannot provide a date because it requires Navy ERP changes. Earliest date would be 2013 but that is only a guess. There are too many higher priorities for Navy ERP ECPs right now.	ADC notes: <i>Navy Implementation date unknown at time of publication of this ADC.</i> Navy Supply PRC representative to monitor for implementation of this this ADC and provide implementation date when available.
DLA 10/3/2011 email response	DLA just completed prioritization for the last half of 2012, the next opportunity for implementation is the first half of 2013.	NOTE: Requires DLA provide DSS and EBS implementation dates. ADC notes: Implementation date for DSS and EBS is unknown at time of publication of this ADC. DLA Supply PRC representative to monitor for implementation of this ADC and provide DSS and EBS implementation dates when available.
GSA 1/5/2009 Email response	GSA will implement during the planned system modernization on schedule for FY2011 or later.	Noted.

Enclosure

ENCLOSURE TO ADC 313

Summary of 1990 MODELS Enhancement Number. 90-010 Related to use of Advice Code with DLMS 527R (PROVIDED AS BACKGROUND)

MODELS RECNO 90-010

DATE: 900112

ORIGINATOR: DLA Logistics Management Standards

SUMMARY: Identify transactions submitted in reply to ICP followup for receipt transaction

DESCRIPTION: Include data in the 527 transaction to indicate when a receipt transaction is in reply to an ICP follow-up. Presently the follow-up reply is an exact match to the receipt transaction. Some Services/Agencies use internal coding to identify such duplicate receipt transactions; however there needs to be inter-Service/Agency capability. The present MODELS transaction may provide sufficient information to accomplish this goal—for instance the presence of the transaction date, providing the transaction date is the date of the transmission, not of the original transaction. Also we could assign a new code.

AFFECTS: Requires system and procedural modification.

BENEFITS: Allows ICPs to easily match the follow-up replies to original receipt transactions when both are received. Enhances DoD supply accountability by eliminating the possibility of posting both transactions.

NARRATIVE OF REQUIRED ACTION: APRIL 1990: Added Advice Code to 527R and 533 [PDC 330 Staffing note: 533 is now 947I Inventory Adjustment] transactions and MILSTRAP Administrator will provide the specific advice codes to define the following:

- a. To DIC DXC/DXD function in DLMS 527R [STAFFING NOTE: DXC/DXD = Beginning Segment 1/BR02/20 Transaction Type Code IN-Inquiry], defined as “receipt in process” [Advice Code 3K]
- b. To DIC DXC/DXD function in DLMS 527R, defined as “no record of due-in” [Advice Code 3N]
- c. To DLMS 527R Receipt (D4_ and D6_) functionality [STAFFING NOTE: D4_/D6_ = 527R Beginning Segment 1/BR02/20 Transaction Type Code D4-Receipt], defined as “duplicate of previously submitted transaction in reply to follow-up” [Advice Code 3P]

[This last advice code from the 1990 enhancement also applies to DS 947I Inventory Adjustment functionality, but DS 947I is not addressed by this ADC]
