ATTACHMENT TO ADC 426

Revise DLMS Supplement (DS) 511R, Requisition to Address Requirements of Navy Usage of Warehouse RIC in Multiuse Field of A0_ (Requisition)

1. ORIGINATING SERVICE/AGENCY AND POC INFORMATION: NAVSUP ERP Supply Chain Team, NAVSUP E3, DSN 430-5070, commercial (717) 605-5070

2. FUNCTIONAL AREA: Primary/Secondary Functional Area: Supply

3. BACKGROUND:

a. Intent of the transaction: Organizations use this transaction set to requisition material.

b. Scenario for which the transaction is used: Navy organic repair facilities requisitioning Navy managed material. This change is associated with intra-Navy requisitions originating in the Commercial Asset Visibility - Organic Repairables Module (CAV-ORM).

c. Procedures, transactions, data elements, processing details in use today: Legacy Navy organic repair systems send requisitions to the Navy Inventory Control Point (ICP) and Fleet Industrial Supply Centers (FISCs) requesting either that they be filled from a certain site or that the requisition be killed. The requisitions are sent as DI Code A0_s and the requested site's Routing Identifier Code (RIC) is included in the legacy format multi-use fields.

4. PROPOSED CHANGE(S):

a. Revise the DLMS to allow for the identification of the desired storage activity from which the requisitioned item is to be supplied. This change will be adopted as an intra-Navy DLMS enhancement in support of organic maintenance requisitioning procedures associated with Project Code Z5X.

b. Revise transaction conversion mapping to perpetuate the Navy storage activity RIC from MILSTRIP legacy format to DLMS (see detail below).

c. Alternatives: None identified.

5. REASON FOR CHANGE: Navy modernized system development is being programmed to be DLMS compliant. In order to support ongoing unique legacy requirements, the MILSTRIP DI Code A0_ storage activity RIC needs to be mapped to the DLMS equivalent.

6. ADVANTAGES AND DISADVANTAGES:

a. Advantages (tangible/intangible): Allows development of a DLMS compliant solution for the 511R functionality.

b. Disadvantages: None identified.

7. ESTIMATED TIME LINE/IMPLEMENTATION TARGET: Expected implementation date is June 2011.

8. IMPACT:

a. DOD 4000.25-M, DS 511R requires update.

b. Defense Automatic Addressing System (DAAS) Legacy MILS/DLMS

Conversion. DLA Transaction Services is required to translate Navy storage activity RIC on A0_ transactions to DLMS 511R transactions when sending them to a DLMS compliant Navy system. Revise MILS to DLMS mapping to add the following: If DOCID (RP 1-3) = A0_ and RIC To (RP4-6) = N** and the Service Code (RP 30) is N, R, or V and the Project Code (RP 57-59) is Z5X, then map N101=SB, N103=M4, and N104=RP 74-76.

c. Automated Information Systems. This change is for intra-Navy use only. No change/impact to other Component systems, to include no change/impact to the DLA Distribution Standard System.

d. DLMS Data Elements. There are no new or revised data elements resulting from this proposal.

e. Publications: MILSTRIP and DLMS format updated as shown in the enclosures.

Enclosure 1, MILSTRIP Revisions - Requisition

Note: Layout also reflects revisions associated with PDC 453, Revisions to Procedures and DLMS 511R Requisition to Support Requisitioning from DLA Disposition Services under Reutilization Business Integration (RBI).
