4. Chapter 7:

a. Paragraph A.2., revise to read as follows:

2. A materiel obligation is herein defined as that unfilled portion of a requisition (for a stocked or nonstocked item) that is not immediately available for issue, but is recorded as a commitment for future issue, either by direct delivery from vendor or backordered from stock. This includes both NSN and non-NSN items. Accordingly, MOV will pertain to those item requisitions to which Status Codes BB, BC, BD, BV, and BZ are applicable. Requisitions which are to be filled by direct delivery from vendors, Status Codes BV and BZ, are excluded from automatic cancellation of the MOV process.

b. Renumber paragraph A.5. to A.6.

c. Insert the following as A.5.:

5. Materiel Obligation Validation Reinstatement Request. A request by a requisitioner to reinstate requisition(s) previously canceled due to requisitioner's nonresponse to a MOV request.

d. Add new subparagraph K.4. to read as follows:

4. Requisitioning activities in receipt of confirmed cancellations (Status Code BS) as a result of the MOV program may request reinstatement of canceled requisitions for a period not to exceed 60 days following the transaction date (rp 62-64) of the BS cancellation. Reinstatement of canceled requisitions will be accomplished on-line; off-line reinstatement requests will not be honored. When reinstatement is required, the requisitioner will furnish the supply source a DI Code APR transaction, MOV Reinstatement Request, for the quantity required, in the format shown in appendix C48. Quantity reinstated may be equal to or less than quantity canceled. Quantity reinstated shall not exceed quantity cancelled.

e. Revise paragraph L.1. (originally paragraph M.1.) to read as follows:

f. Add new paragraph M. to read as follows:

"M. MATERIEL OBLIGATION REINSTATEMENT

1. Supply sources will reinstate supply action on requisition(s) for which a DI Code APR transaction has been received if the requisition was canceled with Status Code BS within the last 60 days. Reinstatement of the requisition will be for the quantity in the DI Code APR transaction which may be equal to or less than the original canceled quantity. If the reinstatement quantity on the APR document is greater than the quantity canceled in the AE_ transaction, Status Code BS, only the quantity in the AE_ document, Status Code BS, will be reinstated. Only the quantity exceeding the BS quantity will be rejected. The DI code APR transaction should be prepared using the AE_ transaction (Status Code BS) as a basis to insure that the correct suffix code is included. The advice code from the original requisition must be perpetuated in the APR transaction or the advice code will be treated as blank. The DI code APR transactions will be rejected *using DI code AE_* (Status Codes DK, DL, DM) for the following reasons: "

a. Received over 60 days after the AE_ (Status Code BS) transaction date,

b. No record of an AE_ transaction (Status Code BS),

c. Requests for reinstatement of a quantity larger than that which was canceled. The quantity canceled is shown in rp 25-29.

2. When the APR transaction is received by the SOS, the latest supply status will be furnished the status eligible recipients.
