1. References:

a. DLSSO-BM letter, 29 September 1986, subject: Request for Implementation Date on Approved MILSTRIP Change Letter (AMCL) 156, FMS Status Procedures, Staffed as Proposed MILSTRIP Change Letter (PMCL) 462.

b. DoD 4140.17-M, MILSTRIP, 16 January 1984, as amended.

2. As a result of staffing reference 1.a, the enclosed change to reference 1.b is established as approved MILSTRIP Change Letter (AMCL) 156, with an implementation date of 1 November 1990. One other change contains a 1 November 1990 implementation date. That change is AMCL 139A, which contains incremental implementation dates of 1 November 1986 for all except; USAF, 1 November 1987, DLA (SAMMs), 1 November 1990.

APPROVED MILSTRIP CHANGE LETTER (AMCL) 156,  
FMS STATUS PROCEDURES

1. Delete existing paragraph 6-25 thru 34 and replace with new paragraphs 6-25 thru 6-34.

6-25 STATUS IN GENERAL

a. Supply sources will provide status only to the ILCO or other monitoring activities identified in rp 54 of appendix C formats. DI code AE3 will be used on supply status, and DI code AS3 will be used on shipment status in response to followups. However, DI code AE8/AS8 will be used in supply source initiated status. It is the responsibility of the ILCO or monitoring activity to furnish status to the appropriate country status recipient.

b. Status from the ILCO/monitoring activity to the MAPAD country status recipient will be transmitted via DAAS.

(1) Status to FMS customers is sent to the MAPAD TAC 4 country status recipient.

(2) Status to Grant Aid customers is sent to the MAPAD TAC 3 country/in-county security assistance organization (SAO) status recipient.

c. The media and status (M&S) code entry in rp 7 should be 0 (zero) to preclude unnecessary status output. The transmission medium is determined by DAAS.

6-26 STATUS UPON REQUISITION INITIATION OR SUBMISSION

a. General. Status is provided by the ILCO to the customer when the requisition enters the supply system.

b. Service initiated requisitions.

When FMS requisitions are prepared and introduced by a U.S. Service, a supply status document representing the U.S. prepared requisition will be transmitted by the introducing U.S. Service to the appropriate MAPAD status recipient. The supply status document may also be prepared for CONUS generated MAP Grant Aid transactions and, when prepared, will be transmitted to the appropriate in-country SAO. The supply status document will contain DI code AE\_ and will contain a code A thru E in the third position to reflect the type of stock number being requisitioned. It is desired that the latest available unit price be entered in rp 74-80; however, this is an optional entry depending on the capability of the Service involved. Status code BU will be entered in rp 65-66 and the ESD in rp 70-73 may be left blank.

6-29 STATUS ON FMS NOTICE OF AVAILABILITY

When FMS requisitions are processed and a NOA is forwarded to the CR/FF, a DI code AE2 supply status document containing Status code BL will be furnished to authorized status recipients at the same time the NOA is forwarded. The BL status advises that the item is available for shipment and was offered to the CR/FF on the date entered in rp 70-73.

6-30 and 6-31 RESERVED

6-32 MODIFICATION OF COUNTRY FMS OFFER/RELEASE OPTION CODE OR FREIGHT FORWARDER CODE

a. Unusual circumstances can require a change in the country FMS offer/release option code or freight forwarder code for an FMS case or for individual requisitions within an FMS case. When this condition exists, FMS customers or ILCOs/monitoring activities may initiate DI code AM requisition modifiers to change the coded data in FMS requisitions which have been released to the supply system.

b. FMS requisition modifier documents will be initiated in accordance with paragraph 2-41. Entries in the requisition modifier document may differ from those in the original requisition only to reflect changes to one or any combination of the following:

- (1) Media and status code, rp 7.
- (2) Country FMS offer/release option code, rp 46.
- (3) Freight forwarder, rp 47.
- (4) Distribution code, rp 54.
- (5) Project code, rp 57-59.
- (6) Priority designator, rp 60-61.
- (7) Required delivery date, rp 62-64.
- (8) Advice code, rp 65-66.

c. Modifiers which change the country FMS offer/release option code or freight forwarder code must be submitted to procurement for manual amendment of contracts. Customers are responsible for additional charges which may accrue. To limit manual processing and avoid additional contract charges, modifiers which change the country FMS offer/release option or freight forwarder codes should be submitted only when the change is mandatory. When DD Forms 1513 have not been amended to reflect the changes, FMS customers must coordinate with the Service ILCO/monitoring activity before requesting requisition modification.
