**MEMORANDUM FOR SUPPLY PROCESS REVIEW COMMITTEE (PRC) MEMBERS**

**SUBJECT:** Proposed Defense Logistics Management Standards (DLMS) Standards (PDC) 1110, Administrative Update to Identify Code DPC Delivery Priority Code as an Approved X12 Migration Code and Update Associated DLMS Documentation

We are forwarding the attached proposed change to Defense Logistics Manual (DLM) 4000.25, Defense Logistics Management System, and DLM 4000.25-1, Military Standard Requisition and Issue Procedures (MILSTRIP) for evaluation and submission of a single coordinated DOD Component position. It is the responsibility of the Component Supply PRC representative to ensure full coordination of the proposal within your Component.

Request you review the attached proposed change and provide your comments/concurrence to the Defense Logistics Management Standards Office not later than **30** days from the date of this memorandum. If nonconcurrence is provided, please provide an alternate method to meet the requirement being addressed.

Addressees may direct questions to the DLMSO points of contact: Ms. Ellen Hilert, DOD MILSTRIP Administrator, 703-767-0676, DSN 427-0676, or e-mail: [Ellen.Hilert@dla.mil](mailto:Ellen.Hilert@dla.mil), or Ms. Heidi Daverede, DOD MILSTRIP Alternate, 703-767-5111; DSN 427-5111 or email: [Heidi.Daverede@dla.mil](mailto:Heidi.Daverede@dla.mil). Others must contact their Component designated representative

A handwritten signature in black ink, appearing to read "Donald C. Pipp", is positioned above the typed name.

**4. PROPOSED CHANGE(S):**

a. **Brief Overview of Change:**

(1) This PDC adds a new Appendix to References 3.a. and 3.b. for Delivery Priority Codes, updates the DLMS Data Dictionary to reflect usage of this data element across applicable DLMS ICs, and updates all DLMS ICs to reflect the approved migration code DPC – Delivery Priority Code.

(2) It applies administrative updates to fix broken hyperlinks in Reference 3.b. Appendix 7.13 for Category C and D Project codes with and without POC information.

(3) It applies administrative updates to the DLMS 511M IC, Requisition Modification, to identify the Party to Receive Status and Priority Designator data elements as modifiable under a requisition modification.

**b. Background:**

(1) ADC 141 revised the DLMS 940R IC to add code R3 Delivery Rank (Priority) at location 2/LQ01/1300. It also documented a table of code values (e.g., A, B, H, O, Q, T, U, V, W, X, Y, and Z) to be mapped to the Delivery Priority Code element at 2/LQ02/1300. That table was never added to MILSTRIP Appendix 2, or DLMS Volume 2, Appendix 7.

(2) ADC 381 renamed the DLMS data element to Delivery Priority Code (alias Delivery Rank (Priority)) and expanded its use in the DLMS 511R, 511M, 869A, 869F, 870S, 856S, 940R, and 945A to support BRAC procedures.

(3) ADC 401 expanded the use of Delivery Priority Code to the DLMS 940S to support BRAC Warehouse Service Request transactions.

(4) During a review of the DLMS 511M IC, it was discovered that two data elements, Party to Receive Status and Priority Designator, were not properly identified as modifiable under normal Requisition Modification Procedures. The DLMS notes need to be updated to reflect that capability.

**c. Describe Proposed Change in Detail:**

(1) Systems that have implemented the DLMS 511M Requisition Modification are authorized to designate the data elements Party to Receive Status and Priority Designator as modifiable under normal MILSTRIP Requisition Modification Procedures. The DLMS 511M IC is updated to reflect this authority.

(2) To support the implementation of Delivery Priority Code in ADCs 141, 381, and 401 (See References 3.c. through 3.e.), a new appendix is added to DLM 4000.25 and DLM 4000.25-1.

**Staffing Note #1:** Request Headquarters DLA, DLA Distribution, and Distribution Standard System (DSS) review the Delivery Priority Codes listed in Enclosure 1 to validate that the codes are still valid and consistent with the associated explanation. **In the DLA response to this PDC, advise DLMSO if you concur with the appendix as written or if any changes are required.**

**Staffing Note #2:** Request all other Component PRC representatives review the Delivery Priority Codes listed in Enclosure 1 to validate that the codes are still valid and consistent with the associated explanation. **In the Component response to this PDC, advise DLMSO if you concur with the appendix as written or if any changes are required.**

**d. Revisions to DLM 4000.25 Manuals:**

(1) Add Appendix 2.26 to DLM 4000.25-1, MILSTRIP. See Enclosure 1.

(2) Update DLMS ICs 511M, 511R, 869A, 869F, 870S, 945A, 856S, 940R, and 940S to identify approval of migration code DPC Delivery Priority Code in the X12 Standard version/release 5030. See Enclosure 2.

(3) Update the hyperlinks for Appendix 7.13 in Appendix 7 to correctly link to the Category C and D Project Codes with and without POC information in MILSTRIP Appendix 2.13. This is an administrative update to fix an oversight in DLM 4000.25, Volume 2, Appendix 7.

## **AP7. APPENDIX 7** **DATA ELEMENTS AND CODES INDEX**

[Preceding text not shown...]	[Preceding text not shown...]
<a href="#">AP7.13</a>	PROJECT CODES
	<i>- Category C and D <u>w/POC Info FOUO, CAC Required</u></i>
	<i>- Category C and D <u>w/o POC info General Access</u></i>
[Intervening text not shown...]	[Intervening text not shown...]
<b><i>AP7.26</i></b>	<b><i>DELIVERY PRIORITY CODES</i></b>

***(Note: Hyperlinks in Appendix 7 will need to be updated once changes are implemented.)***

(4) Add Appendix 7.26 to DLM 4000.25, Defense Logistics Management System, Volume 2, Appendix 7. Hyperlink it to MILSTRIP Appendix 2.26.

**e. Proposed Transaction Flow:** There are no changes to current transaction flows.

**f. Alternatives:** None identified.

## 5. REASON FOR CHANGE:

- a. Completes the DLMS documentation originally approved in ADC 141.
- b. Administratively fixes missing project code links in DLMS Volume 2, Appendix 7.
- c. Updates LOGDRMS to reflect full usage of the Logistics Qualifier Delivery Priority Code.
- d. Updates DLMS notes in applicable DLMS ICs to identify the approved migration code DPC from version 5030.

## 6. ADVANTAGES AND DISADVANTAGES:

- a. **Advantages:** Adds an appendix to DLM 4000.25 and DLM 4000.25-1 identifying the metadata and accompanying code list for Delivery Priority Code and updates the DLMS Implementation Conventions to reflect the migration code for future use in X12 Version 5030.
- b. **Disadvantages:** None Identified.

**7. ADDITIONAL FUNCTIONAL REQUIREMENTS:** For those systems that implemented Delivery Priority Code R3 in the DLMS 940R and/or the Delivery Priority Code KJ in the DLMS 511R, 511M, 869A, 869F, 870S, 856S, 940R, and 945A, there is no requirement to modify systems to implement the approved migration Code DPC under X12 version 5030. If at some point in the future DLMS ICs are upgraded to X12 version 5030, the migration code should be implemented at that time; any such action will be documented via a coordinated DLMS change.

**8. ESTIMATED TIME LINE/IMPLEMENTATION TARGET:** Pending the results of the review of the Delivery Priority Codes and corresponding definitions by the Components, a determination will be made in the ADC as to whether or not there is a systems implementation requirement.

**9. ESTIMATED SAVINGS/COST AVOIDANCE ASSOCIATED WITH IMPLEMENTATION OF THIS CHANGE:** None.

## 10. IMPACT:

- a. **New DLMS Data Elements:** There are no new DLMS data elements introduced by this change.
- b. **Changes to DLMS Data Elements:** Update LOGDRMS Data Element Dictionary for Delivery Priority Code as follows:

(1) Update remarks for Logistics Qualifier R3 to reflect DPC Delivery Priority Code as an approved migration code for X12 version/release 5030.

(2) Add Logistics Qualifier KJ with similar updated content as Logistics Qualifier R3.

(3) Add Logistics Qualifier DPC with similar content as Logistics Qualifier R3. In the Rremarks, annotate that Logistics Qualifiers R3 and KJ can be used as borrowed codes until such time as a future DLMS change upgrades ICs to the X12 5030 version.

(4) Update the LOGDRMS Core Data Element Table for data element Delivery Priority Code to add the 945A to the listing of DLMS ICs carrying this data element. This change was previously approved under ADC 381.

**c. Automated Information Systems (AIS):** If during staffing of the PDC, Components identify changes to the Delivery Priority Code list and definitions, this section will be updated to reflect systems impact.

**d. DLA Transaction Services:**

(1) Update the 940R to DIC A5\_ mapping conversion for Delivery Priority Code to reflect the original intentions of both ADC 141 and ADC 381. The 2014 version of the 940R map erroneously removed Delivery Priority Code with ADC 381 as the reason for the change, when in fact the intent of ADC 381 was to state that only for Requisition Alert transactions (identified by the “future” flag in the beginning segment), do not transmit the new data elements to legacy systems using legacy MILSTRIP transaction formats. The only change that should have occurred was to rename the data element in the DAAS map from Type of Issue Code to Delivery Priority Code, retaining the mapping between the DIC A5\_ rp 73 and the 2/LQ01/1300 = R3.

(2) Verify that all other maps are current based on the updates in Enclosure 2.

**e. Non-DLA Logistics Management Standards Publications:** None.

## AP2.26. APPENDIX 2.26

### DELIVERY PRIORITY CODES

NUMBER OF CHARACTERS: One

TYPE OF CODE: Alpha

EXPLANATION: The delivery priority code communicates special processing priority requirements to the Distribution Standard System for DLA Distribution Center shipments under agreements with DOD Components. Delivery priority codes carry no precedence in ICP asset allocation decisions. Asset allocation decisions are controlled by UMMIPS as defined in DoD 4140.01-M, DoD Supply Chain Materiel Management Procedures (February 10, 2014) and by DLM 4000.25-1, Military Standard Requisitioning and Issue Procedures (MILSTRIP). This data element is found in MILSTRIP legacy DIC A5\_ and DLMS Implementation Conventions (ICs) 511M, 511R, 869A, 869F, 870S, 856S, 940R, 940S, and 945A.<sup>1,2,3</sup>

- Only Code X is valid in the 511M, 511R, 869A, 869F, 870S, 856S, 940S, and 945A DLMS ICs.
- All codes are valid in the DLMS IC 940R.

RECORD POSITION: 73
