MEMORANDUM FOR:  SUPPLY PRC MEMBERS

SUBJECT:  Approved DLMS Change 76, Air Force Unique Coding for Not Mission Capable Supply/Mission Impaired Capability Awaiting Parts (NMCS/MICAP) (Supply) (Staffed by PDC 76)

This change to the DoD 4000.25-M, Defense Logistics Management System (DLMS), is approved for implementation. This change is required to support continued operations in a mixed DLSS/DLMS environment. The approved change DLMS supplements will be posted to the DLMSO web site (http://www.dla.mil/j-6/dlms/ICs/Default.htm) within 30 days from the above date for implementation planning. The attached change to DLMS will be incorporated into the DLMS manual/supplements/maps, based upon the effective or availability date to be determined.

Addressees may direct questions to the DLMSO points of contact, Ms. Ellen Hilert, Chair, Supply Process Review Committee, 703-767-0676, DSN 427-0676, or e-mail: ellen_hilert@hq.dla.mil or Ms. Vermella Savage, DoD MILSTRIP System Administrator, 703-767-0674, DSN 427-0674, or e-mail: vermella_savage@hq.dla.mil. Others must contact their Component designated representative.

Air Force Unique Management Coding for NMCS/MICAP

1. ORIGINATOR:
   b. Originator: Mrs. Bobbie Ziolek

2. FUNCTIONAL AREA: Supply

3. REQUESTED CHANGE:
   a. Title: Air Force Unique Management Coding for NMCS/MICAP
   b. Description of Change: The Air Force will require the use of a new data element to support legacy system requirements to adequately process supply transactions using EC/EDI processes. This data element will be used within our supply system to provide information/justification related to a NMCS/MICAP that is currently identified in the Required Delivery Date field (rp 62-64). When RDD coding identifies a NMCS condition (rp 62=N), a unique AF NMCS/MICAP justification code is reflected in rp 63-64. The two data elements work together. The N in rp 62 is already programmed in Special Requirements Code, but the new AF unique data element is requested for the DLMS in order to perpetuate the data in rp 63-64 required by our legacy systems. A separate 1270 qualifier is being requested so that the AF will continue to maintain control over this unique code list. Other Services/Agencies using DLMS should take no action concerning this code, merely perpetuate it for AF continued use. Per SPRC 02-2 recommendation, DLSMO has included in this proposal a comparable description of the NMCS/MICAP justification coding for publication in MILSTRIP.
   c. Procedures:
      (1) DoD. Modify MILSTRIP Appendix AP2.14, Priority Designators, Standard and Required Delivery Dates (Record Positions 60-61 and 62-64) to add new subparagraph:

      AP2.14.12.1. USAF requisitioning activities may submit justification for identification of a NIMCS or Mission Impaired Capability Awaiting Parts (MICAP) situation in accordance with USAF guidance. Unique USAF justification coding will be contained in rp 63-64 when rp 62 is N. Other Components will perpetuate justification data with no action.

4. **REASON FOR CHANGE:** This data is a unique data element for Air Force requisition processing that will continue to be used until a standard DoD weapon system coding methodology has been established to which the Air Force will have successfully reprogrammed.

5. **ADVANTAGES AND DISADVANTAGES:**

   a. **Advantages:** The advantages are to Air Force legacy system requirements based upon the current operating software program logic. The transition from the current legacy management data to a standard weapons system coding structure will be a massive cataloging effort for the Air Force. This requested change provides a logical interim step towards a planned transition to a standard weapon system coding structure and will ensure an uninterrupted flow of the requisition processing capability with Air Force legacy systems.

   b. **Disadvantages:** None known.

6. **IMPACT:**

   **Transaction Set(s):** Request code additions to Version 4010 of the following ICs:

   - 511M  Requisition Modification
   - 511R  Requisition
   - 846L  Logistics Asset Support
   - 869A  Requisition Inquiry and Supply Assistance
   - 869F  Requisition Follow-Up
   - 940R  Material Release (4030 Version)
   - 945A  Materiel Release Advice

7. **Segment(s):** LQ

8. **Data Elements:** Versions 4010 and 4030 (as identified in paragraph 6, above), DE 1270 Code List Qualifier Codes. Request addition of a separate AF unique qualifier under LQ Industry Code, DE 1270, and the associated code value implementation note to ICs/DSs referenced under paragraph 6, above. Until the new ANSI code is assigned, use an interim substitute code as indicated below:
RC Requirement Code

Federal Note: Use to identify the Air Force Urgency Justification Code indicating the urgency of need and type of requirement (justification) related to a Not Mission Capable Supply/Mission Impaired Capability Awaiting Parts (NMCS/MICAP) condition.

DLMS Note: Use in conjunction with Special Requirements Code N (2/LQ01/Code AL or perpetuated from DLSS Required Delivery Date field). This is an Air Force-unique data element, meaningful to the Air Force only. Non-Air Force Components perpetuate without action. An ANSI data maintenance request has been prepared to request a new data element 1270 code qualifier assignment for the Urgency Justification Code. The code source is identified as the Air Force Manual (AFMAN) 23-110, Volumes 1 and 2.

In addition, include the following clarifying DLMS note 3 in applicable DSs (2/LQ01/Code AL):

AL Special Requirements Code

Federal Note: Use to identify precedence, special handling, and processing requirements.

DLMS Note:
1. Under DLSS this is carried in the Required Delivery Date field.
2. DLMS enhancement, see introductory DLMS note ___.
3. **Use in conjunction with 2/LQ01/Code RC, Requirement Code, to complete the Air Force unique NMCS/MICAP data requirement.**
